

Excel formulas used for the dataset

1) Sum, Count, Average:

- Total price of all products
Formula: =SUM(D2:D35)
- Number of products in the dataset
Formula: =COUNTA(B2:B35)
- Average product price
Formula: =AVERAGE(D2:D35)

2) MIN and MAX

- Minimum price of all products
Formula: =MIN(D2:D35)
- Maximum price of all products
Formula: =MAX(D2:D35)

3) IF Function:

Categorize products with a price greater than or equal to \$500 as 'High Price' and others as 'Standard Price'

Formula: =IF(D2>500,"High Price","Standard Price")

4) SUMIF and COUNTIF:

- Total price for products in the 'Electronics' category
Formula: =SUMIF(F2:F35,"Electronics",D2:D35)
- Count of products with a price less than \$100
Formula: =COUNTIF(D2:D35,"<100")

5) Text Formatting - LEFT, RIGHT, MID:

- Extract first two characters from the Product ID to obtain the day
Formula: =LEFT(A2,2)
- Extract last two characters from the Product ID to obtain the country code.
Formula: =RIGHT(A2,2)
- Extract three characters starting from the fourth character of the Product ID to obtain the month.
Formula: =MID(A2,4,3)
